PREFACE AND ACKNOWLEDGMENTS

When we began this project we thought it would be a relatively simple undertaking. We already had in machine-readable form the bulk of the data reproduced on the following pages, and all that seemed to remain was filling in a limited number of missing elections, preparing an appropriate format, checking the data for errors, and writing introductory material. We soon learned once again, however, that manipulating masses of data is not a simple chore. If nothing else, this project vastly increased our respect for Walter Dean Burnham, Paul T. David, Alexander Heard, Donald S. Strong, Richard M. Scammon, and other compilers who have cataloged and presented election data often more difficult to acquire than the data reported here and who in some cases had access to less sophisticated hardware than was available to us.

In preparing this volume we accumulated a number of debts. We wish to express our thanks to Bernard Wess, Associate Director of Data Processing at UMBC; to Charles Bowen, the long-suffering programmer/analyst, who designed the programs for producing the data; to Irene DuMais, who cleaned the data; and to Jimmy Kilgore, a University of Georgia graduate student, who performed in good spirits the onerous task of checking the data for errors. We, of course, accept the responsibility for those mistakes that remain.

INTRODUCTION

This volume is designed to accomplish a dual purpose. The first is to make available in a convenient form election statistics not collected elsewhere. In this regard we have designed the book to fit into the existing literature. A quarter of a century ago, Alexander Heard and Donald S. Strong compiled Southern Primaries and Elections, 1920-1949 (University: University of Alabama Press, 1950). Both Heard and Strong were associated with V. O. Key, Jr., and the research project that led to the publication of Southern Politics in State and Nation by Alfred A. Knopf in 1949; and their data book contained the election statistics accumulated as the analytical base for Key's modern classic.

Our book begins with the 1950 primary elections and is conceived as a continuation of Southern Primaries and Elections, 1920-1949. These two volumes contain the county-level results of major primary elections and pertinent referenda for the eleven states of the former Confederacy from 1920 to 1972. General election returns by county are not included in this volume, since these are available for the post-World War II years in Richard M. Scammon (comp.), America Votes: A Handbook of Contemporary American Election Statistics (11 vols.; Washington, D.C.: Governmental Affairs Institute, 1956-1975). Scammon has also compiled America at the Polls: A Handbook of American Presidential Election Statistics, 1920-1964 (Pittsburgh: University of Pittsburgh Press, 1965).

The second purpose of this book is a broader one. Unlike the other collections mentioned above, this volume includes basic demographic and geographic analysis. The

returns are, of course, reported by county, with the number and percentage of votes received by each candidate and the statewide totals and percentages. But they are additionally aggregated into categories. Demographically, there are metropolitan, town, and rural categories for each state. Specifically, metropolitan counties are those that contained in 1960 all or part of a city of more than 50,000 population, as well as suburban Jefferson Parish in Louisiana and Chesterfield County in Virginia. Town counties contained a city of 20,000 to 50,000 people in 1960. Rural counties are those with no urban community of 20,000 population.

Geographically, the counties in each state are grouped into recognized sectional divisions. The general groupings are mountain, piedmont, black belt, and lowland. The mountain category includes the southern Appalachian counties, the Arkansas Ozark and Ouachita counties, and a number of "traditionally Republican" highland counties. The piedmont counties are those located between the Appalachian Mountains and the fall line, excluding any county containing a 1960 black population of 40 percent or more. The black belt classification includes all counties in which blacks made up 40 percent or more of the population according to the 1960 census. The lowland category contains the tidewater, coastal plains, wire grass, and delta--the predominantly white lowland counties generally.

Alabama, Georgia, North Carolina, and Virginia are divided into these four categories. Mississippi and South Carolina contained no mountain counties, and votes are reported as piedmont, black belt, and lowland. Arkansas counties are grouped as mountain, black belt, and lowland. Florida is divided

between the predominantly metropolitan, tourist-oriented southern portion of the state and the northern section that borders Alabama and Georgia, with a separate category for those few counties containing a 1960 black population of more than 40 percent. Louisiana is split between black belt, Catholic Louisiana (those counties in the southern portion of the state in which Catholics were estimated to be in the majority in 1960), and predominantly Protestant northern Louisiana. Texas returns are grouped into eastern Texas, western Texas, Mexican-American Texas (those south Texas counties estimated to contain a Chicano population of 40 percent or more in 1950), and black belt. Finally, Tennessee counties are categorized as east (mountain), middle (Nashville Basin), west (lowland), and black belt (only Fayette and Haywood counties). For a more detailed explanation of these classification procedures, see our Southern Politics and the Second Reconstruction (Baltimore, Md.: Johns Hopkins University Press, 1975). The demographic and sectional totals for each state present a general overview of each election and provide a basis of comparison for the political behavior of any individual county.

Additionally, the latter part of this volume contains a socioeconomic analysis of precinct returns from 24 southern cities: Birmingham and Montgomery in Alabama; Little Rock in Arkansas; Jacksonville and Miami in Florida; Atlanta and Macon in Georgia; Baton Rouge, New Orleans, and Shreveport in Louisiana; Jackson in Mississippi; Charlotte, Greensboro, and Raleigh in North Carolina; Charleston and Columbia in South Carolina; Memphis and Nashville in Tennessee; Fort Worth, Houston, and Waco in Texas; and

Norfolk, Richmond, and Roanoke in Virginia. In each city we divided precincts on the basis of census data into five categories that reflected distinctions of race and economic class: 1) black, 2) lower-class white, 3) lower middle-class white, 4) upper middle-class white, and 5) upper-class white.

Precincts were first divided along racial lines, with predominantly black precincts so designated and racially mixed precincts eliminated from the analysis. Predominantly white precincts were then quartiled by assigning equal weight to median family income, median house value, and median years of education. Precincts too heterogeneous to be classified were excluded. Prior to the mid-1960s so few blacks voted in a few Deep South cities--notably those in Alabama and Mississippi--that all-black precincts were difficult to isolate. The precinct data suggest the voting tendencies of socioeconomic groups, and they are included for the purpose of fleshing out the individual and categorically aggregated data. It does not necessarily follow, of course, that because the black or lower-class white precincts in a particular city voted in a certain manner, the blacks or lower-class whites throughout the state also did so. But the precinct analysis does indicate the patterns in the 24 cities included and is strongly suggestive as to the socioeconomic voting patterns in other cities and towns. The precinct data include both general and primary election results. Preceding the election data for each state is a separate introduction that summarizes some of the peculiarities of that state's politics, and a county map. The figures on turnout in presidential elections in the state introductions include an estimate of the percentage of citizens of

voting age who voted, which is slightly different from voting-age population, since aliens are excluded.

In addition to the analytical material, this work also contains limitations with which users should be aware. Both to conserve space and to make the data more usable, we have in many cases combined the votes for minor candidates under the heading "other" and have in some instances excluded from the printed returns candidates who received a negligible number of votes. The list of elections in each state introduction summarizes the elections and provides total votes and percentages for the candidates. Southern Democratic primary elections often attracted crowded fields of contestants (though rarely as many as the 71 candidates whose names appeared on the ballot in the 1961 special senate election in Texas); to have listed the county returns for all contenders would have made this work much longer and, in our opinion, considerably less useful. Additionally, relatively uncontested primary elections (mainly Senate races in which veteran incumbents brushed aside light opposition or were unopposed altogether) have been excluded. These elections are listed in the state introductions and are marked by asterisks.

This volume grew out of Southern Politics and the Second Reconstruction, our analysis of the main tendencies in southern politics during the post-World War II era. That work contains an extensive bibliography, but it might be worth noting that V. O. Key's path-breaking Southern Politics in State and Nation, the state-by-state diagnosis in William C. Havard (ed.), The Changing Politics of the South (Baton Rouge: Louisiana State University Press, 1972), and the

regional analysis in Southern Politics and the Second Reconstruction provide the background material that is important in interpreting the data in this volume.

ALABAMA

Potential voters faced formidable obstacles in Alabama until the mid-1960s. During the early post-World War II years, the \$1.50 poll tax was cumulative, though a voter who paid poll taxes through age 45 was exempt thereafter. In 1953 a constitutional amendment limited the cumulative features to two years, and the state attorney general ruled that the amendment thus granted registrants 47 years of age and older a free vote whether they had previously paid the tax or not. Military veterans were also exempt. Other voters 21 to 46 years of age still had to remember to pay the levy by February 1 in election years. Registration also required two years' residency in the state, one year in the county, and three months in the voting district. The most difficult hurdle of all was the voter qualifications amendment of 1951 (ratification election results are reprinted below), which required that a registrant be literate, of good character, and able to answer unassisted a lengthy written questionnaire.

These conditions, in addition to a twentieth-century tradition of limited citizen participation, insured low registration and turnout, especially among black citizens. In 1952 scarcely more than 25,000 blacks were registered, a figure that by 1960 had grown to an estimated 66,000, or 13.7 percent of the black voting-age population. During the mid-1960s, federal intervention in defense of voting rights opened the way to a broader franchise. By 1970 an estimated 315,000 blacks, or 66 percent of the voting-age population, were registered. White voter registration also grew sharply, increasing from approximately 860,000 in 1960 to 1,311,000 in

1970. Blacks comprised an estimated 7.1 percent of the total number of registered voters in 1960 and 19.4 percent in 1970.

The votes cast in presidential elections from 1948 to 1972 illustrate some of the changing themes of Alabama politics. Turnout, expressed both in the number of ballots cast and in the percentage of citizens of voting age who did vote (the figure in parentheses), and the dramatic shifts in partisan preferences of the voters are evident in the following table of returns from presidential elections.

This volume contains 20 Alabama elections, including 9 Democratic gubernatorial primaries, 8 Democratic senatorial primaries, and 3 referenda.

Gubernatorial Primaries

1. May 2, 1950: Elbert Boozer 48,021 (11.9%), Phillip J. Hamm 56,395 (14.0%), J. Bruce Henderson 38,867 (9.7%), Gordon Persons 137,155 (34.1%), Chauncey Sparks 27,404 (6.8%), other 10 candidates 94,444 (23.5%). Total vote was 402,286; turnout of voting-age citizens was 23.1%. (No runoff was held; Phillip J. Hamm conceded.)
2. May 4, 1954: James B. Allen 61,680 (10.4%), Jimmy Faulkner 152,925 (25.7%), James E. Folsom 305,394 (51.2%), J. Bruce Henderson 47,969 (8.1%), C. C. Owen 23,123 (3.9%), other 2 candidates 4,950 (0.8%). Total vote was 596,041; turnout was 33.5%.
3. May 6, 1958: John Patterson 196,859 (31.8%), George C. Wallace 162,435 (26.3%), Jimmy Faulkner 91,512 (14.8%), A. W. Todd 59,240 (9.6%), Laurie C. Battle

- 38,955 (6.3%), other 9 candidates 69,642 (11.3%). Total vote was 618,643; turnout was 34.1%.
4. June 3, 1958: John Patterson 315,353 (55.7%), George C. Wallace 250,451 (44.3%). Total vote was 565,804; turnout was 31.2%.
 5. May 1, 1962: Eugene "Bull" Connor 23,019 (3.6%), Ryan deGraffenried 160,704 (25.3%), James E. Folsom 159,640 (25.1%), MacDonald Gallion 80,374 (12.6%), George C. Wallace 207,062 (32.5%), other 2 candidates 5,606 (0.9%). Total vote was 636,405; turnout was 34.0%.
 6. May 29, 1962: Ryan deGraffenried 269,122 (44.1%), George C. Wallace 340,730 (55.9%). Total vote was 609,852; turnout was 32.6%.
 7. May 3, 1966: Carl Elliott 71,972 (8.1%), Richmond M. Flowers 172,386 (19.4%), Bob Gilchrist 49,502 (5.6%), Lurleen Wallace 480,841 (54.1%), other 6 candidates 114,137 (12.8%). Total vote was 888,838; turnout was 45.7%.
 8. May 5, 1970: Albert Brewer 428,146 (42.0%), George C. Wallace 416,443 (40.8%), Charles Woods 149,887 (14.7%), Asa Carter 15,441 (1.5%), other 3 candidates 9,763 (1.0%). Total vote was 1,019,680; turnout was 50.5%.
 9. June 2, 1970: Albert Brewer 525,951 (48.4%), George C. Wallace 559,832 (51.6%). Total vote was 1,085,783; turnout was 53.7%.

Senatorial Primaries

1. May 2, 1950: Lister Hill 228,524 (67.0%), Lawrence McNeil 112,615 (33.0%). Total

- vote was 341,139.
2. May 4, 1954: Laurie C. Battle 208,166 (37.5%), John G. Crommelin 19,579 (3.5%), John J. Sparkman 323,807 (58.2%), William C. Irby 4,320 (0.8%). Total vote was 555,872.
 3. May 1, 1956: John G. Crommelin 114,635 (31.5%), Lister Hill 249,270 (68.5%). Total vote was 363,905.
 - * (May 3, 1960: John J. Sparkman won 83.1% against 2 opponents. Total vote was 404,085.)
 4. May 1, 1962: John G. Crommelin 56,822 (11.5%), Donald G. Hallmark 72,855 (14.8%), Lister Hill 363,613 (73.7%). Total vote was 493,290.
 5. May 3, 1966: John G. Crommelin 114,622 (17.3%), Frank E. Dixon 133,139 (20.1%), John J. Sparkman 378,295 (57.0%), Mrs. Frank R. Stewart 37,889 (5.7%). Total vote was 663,945.
 6. May 7, 1968: James B. Allen 224,483 (41.9%), Armistead I. Selden 190,283 (35.5%), Robert Smith 72,928 (13.6%), James E. Folsom 32,004 (6.0%), other 2 candidates 16,294 (3.0%). Total vote was 535,992.
 7. June 4, 1968: James B. Allen 196,511 (50.5%), Armistead I. Selden 192,448 (49.5%). Total vote was 388,959.
 8. May 2, 1972: Melba Till Allen 194,690 (29.5%), Robert Edington 22,145 (3.4%), Lambert C. Mims 87,461 (13.2%), John J. Sparkman 331,838 (50.3%), other 3 candidates 24,206 (3.7%). Total vote was 660,340.

Special Elections

1. December 11, 1951: Civil Service amendment making "appointments and promotions in the Civil Service" dependent on "merit, fitness and efficiency." For 78,230 (63.5%), Against 44,879 (36.5%). Total vote was 123,109.
2. December 11, 1951: Voter qualifications amendment. For 60,357 (50.15%), Against 59,988 (49.85%). Total vote was 120,345.
3. August 28, 1956: Freedom-of-choice amendment abrogating "any right to education or training at public expense" and empowering the legislature to "authorize the parents or guardians of minors, who desire that such minors shall attend schools provided for their own race, to make election to that end." For 128,586 (61.3%), Against 81,066 (38.7%). Total vote was 209,652.

ARKANSAS

The Arkansas Constitution required payment of a noncumulative, \$1-per-year poll tax until the provision was eliminated for federal elections by the Twenty-Fourth Amendment to the United States Constitution, which became effective in January, 1964. The provision was eliminated for state elections by an amendment to the Arkansas Constitution ratified later in 1964. Haphazard registration procedures and legislation relating to membership in the Democratic party gave wide discretion to local election officials and, prior to the mid-1960s, frequently resulted in the disfranchisement of black voters and some reportedly questionable county election returns.

Black voter registration wavered between 60,000 and 70,000 during the 1950s, and reached an estimated 72,600 in 1960, which was 38 percent of the black voting-age population and 12.4 percent of the total voter registration. As in other southern states, voter registration by both blacks and whites increased substantially during the 1960s. By 1970 the approximately 153,000 registered blacks represented 17.4 percent of all registered voters in the state.

The following data on presidential elections in Arkansas are suggestive of general trends in turnout and partisanship. Turnout is expressed both in total votes cast in the state and in the percentage of citizens of voting age who cast ballots.

There are 22 Arkansas elections in this section, 17 of them Democratic gubernatorial primaries and 5 of them Democratic senatorial primaries.

FLORIDA

Florida had no disfranchisement provisions, although the residency requirement of one year in the state and six months in the county was probably significant in such a rapidly growing state. Black registrants numbered approximately 120,000 in 1952, 180,000 in 1960, and 300,000 in 1970. White voter registration increased at such a rapid rate, however, that blacks remained about 10 percent of the total number of registered voters throughout the period.

The table below summarizes presidential voting in Florida. Turnout figures include both the total number of ballots cast and the estimated percentage of citizens of voting age who voted.

The following pages include 13 Democratic gubernatorial primaries. The 1954 contest was a special primary to fill the unexpired term of Dan McCarty, who died in 1953. Florida approved a constitutional amendment shifting gubernatorial elections away from presidential election years, and consequently the election of 1964 was for a two-year term. The constitution of 1968 provided for the reestablishment of a lieutenant governor's office and required that a governor and lieutenant governor be listed on the ballot as a ticket. Additionally, this section contains 7 Democratic senatorial primaries, 3 Republican primaries, the 1972 Democratic presidential primary, and the vote on 3 proposed constitutional amendments, for a total of 27 elections.

County-unit votes rather than popular votes decided primary elections in Georgia prior to 1962. This system, which grossly discriminated against the metropolitan counties, assigned unit votes to each county and stipulated that the candidate in a primary election who carried a county won that county's unit votes. The 121 least populous counties cast 2 unit votes each, the 8 largest counties cast 6 each, and the 30 intermediate counties had 4 votes each. Thus the 121 predominantly rural counties, containing less than one-third of the people in 1960, cast a majority of the unit votes. Since black Georgians voted more freely in the cities than in the countryside, the county-unit system effectively limited the political influence of both urbanites and blacks. The Georgia Constitution also contained provisions for a literacy test, but this requirement was not widely enforced on the county level. Federal court decisions abrogated the county-unit system in 1962, and the literacy requirements fell victim to the Civil Rights Act of 1965.

Black voter registration in Georgia increased from approximately 140,000 in 1950 to an estimated 180,000 in 1960 and more than doubled to around 395,000 in 1970. In 1960 approximately 29 percent of potential black voters were registered, comprising 15 percent of all registered voters; in 1970 some 57 percent of voting-age blacks were on the registration lists, representing almost 20 percent of the total number of registered voters.

The following table summarizes presidential voting results in Georgia. Turnout figures are given both in total number of

votes cast and in percentage of citizens of voting age casting ballots.

The pages below include 7 gubernatorial and 3 senatorial Democratic primaries and 2 constitutional amendment elections. In the gubernatorial primaries of 1950 and 1954, Herman E. Talmadge and Marvin Griffin received a majority of the county-unit ballots although winning only pluralities in the popular vote. There were two senatorial primaries on both August 8 and August 29, 1972. One was for the unexpired term of Richard B. Russell, who died in 1971, and the other was for a full six-year term, but the candidates were the same in each race. The first primary returns included here are for the unexpired term; the second primary returns are for the full term.

Gubernatorial Primaries

1. June 28, 1950: Herman E. Talmadge 287,637 (49.3%), Melvin E. Thompson 279,137 (47.9%), other 3 candidates 16,238 (2.8%). Total vote was 583,012; turnout of voting-age citizens was 26.8%.

Louisiana Democratic gubernatorial primaries consistently attracted almost half the citizens of voting age to the polls during the 1950s and more than half during the late 1960s and in 1971. As in other southern states, the number of registered voters increased substantially during this period. In 1950 there were some 818,000 registered voters, which was 51.9 percent of all citizens of voting age in the state; in 1960 registration was 1,152,151, or 63.9 percent of the citizenry; and in 1970 it was approximately 1,462,000 or 71.6 percent. The number of black registered voters grew from 7.5 percent of the total in 1950 to 13.8 percent in 1960 and to 21.8 percent in 1970. The Louisiana Constitution required that potential voters be able to read and understand any part of the constitutions of the United States and Louisiana or be able to interpret any section read to him, thus providing registrars with a device to limit black participation prior to the mid-1960s. In 1960, 31.1 percent of blacks of voting age were registered, compared to 57.4 percent in 1970. White registration remained relatively stable, with 76.9 percent of the voting-age population registered in 1960 and 77 percent in 1970.

The following table presents returns from recent presidential elections. Turnout figures include both total number of votes cast and the percentage of citizens of voting age who voted.

Included below are 9 Democratic gubernatorial primaries, 3 senatorial primaries, and the vote on a segregation amendment proposed during the conflict over school desegregation in New Orleans. Additionally, the 1956

primary for lieutenant governor is included as a demonstration of the relatively structured Democratic party factional competition that existed in Louisiana. Although listed separately on the ballot, candidates campaigned as part of a ticket or slate. In 1956 Earl K. Long and Lether E. Frazar headed the Long forces, and the major reform contenders were deLesseps S. Morrison-C. E. Barham, Frederick T. Preaus-A. Brown Moore, and James M. McLemore-J. Bentley Alexander. In 1960 the Long candidate failed to make the runoff, and the politics of economic class were displaced by the politics of race and religion.

MISSISSIPPI

No other state in the union erected such stringent barriers to voting as did Mississippi. A potential voter had to pay the poll tax of \$2 or more (since counties could add as much as \$1 to the state tax) by February 1 and at the same time show evidence of having paid the tax for the two previous years. Residency requirements were two years in the state and one year in the community. Prior to 1954 a registrant had to be able to read a portion of the Mississippi Constitution or interpret a section read to him. In 1954 a constitutional amendment required a prospective voter to command the ability to read, write, and demonstrate a "reasonable interpretation" of a part of the Mississippi Constitution to the satisfaction of the registrar and further to show a "reasonable understanding" of the obligations and duties of citizenship. Additionally, the potential voter had to complete unassisted a written application for registration. As Russell H. Barrett noted in 1960, Mississippi was "the only southern state with a combination of 'understanding,' literacy, poll tax and the two-year residence requirements."* Later that same year, Mississippians ratified a constitutional amendment (election results reprinted below) requiring that a registrant

be of "good moral character." As an added safeguard, the Mississippi legislature required that the names of all applicants for registration be published locally.

Given all of this, it is not surprising that few blacks voted in Mississippi prior to the mid-1960s. During the 1950s there were an estimated 20,000 black registrants. In 1960 the figure was approximately 22,000, slightly above 5 percent of the black voting-age population. A dramatic increase in black registration followed the 1965 Voting Rights Act, so that in 1970 some 286,000 black Mississippians, 71 percent of the black voting-age population, were registered. Consequently, less than 5 percent of Mississippi's registered voters were black during the 1950s and hardly more than that in the early 1960s; in 1970, however, almost 30 percent of the state's registrants were blacks.

The following table sketching election returns in recent presidential contests indicates not only the surge in voter turnout but also the massive shifts in partisan choice. Turnout figures are given in both total number of votes and, in parentheses, the percentage of the voting-age citizens who voted.

This section contains 12 Democratic gubernatorial primaries, 1 senatorial primary, and 5 referenda, for a total of 18 elections.

COUNTIES

SCALE IN MILES

NORTH CAROLINA

The North Carolina Constitution required that every registrant "shall be able to read and write any section of the Constitution in the English language." This test was suspended in 40 of North Carolina's 100 counties as a result of the 1965 Voting Rights Act. The bulk of these counties were located in the heavily black eastern portion of the state. Black voter registration grew consistently during the 1950s. In 1947 there were some 75,000 black registrants; in 1958 there were almost 180,000, which was 30.9 percent of the black voting-age population; and in 1960, there were over 210,000, which was 31.2 percent of the potential. In both 1958 and 1960 black registrants were about 10 percent of all registered voters. Black registration continued to increase during the 1960s. In 1964 the 258,000 registered blacks were 11.7 percent of all registered voters in the state; in 1966 black registration had reached 281,000, or just over half of the voting-age black population; and in 1970 the approximately 305,000 registered blacks were 15.7 percent of North Carolina's registered voters. Despite this steady growth in black political participation, only 51.3 percent of voting-age blacks were registered in 1970, which was the lowest such figure of all southern states. Approximately 1,640,000 whites, or 68.1 percent of the white voting-age population, were registered in 1970.

The following table presents election returns in recent presidential elections. Turnout figures are expressed both in the number of ballots cast and the percentage of citizens of voting age who voted.

This section contains 8 Democratic guber-

natorial primaries, 6 senatorial primaries, 3 Republican primaries, and the 1972 Democratic presidential primary. The 1954 senatorial primary included here is the contest for the regular senate term; W. Kerr Scott also won nomination for the unexpired term of the senate seat made vacant by the death of Willis Smith.

SOUTH CAROLINA

COUNTIES

SOUTH CAROLINA

When South Carolina required a general re-registration of voters in 1958, 536,205 people signed up. Of these, 57,978, or 10.8% of the total, were blacks. A decade later, in 1968, the state again cleansed the rolls. This time, 853,014 persons registered, of whom 200,778, which was 23.5 percent of the total, were blacks. In 1960, an estimated 57.1 percent of adult whites and 13.7 percent of adult blacks were registered; in 1970 the registered electorate included an estimated 62.3 percent of voting-age whites and 56.1 percent of voting-age blacks. Throughout the period, South Carolina had relatively lenient registration laws, although the state constitution did require that a registrant be able to read or write a section of the state constitution or to demonstrate payment of taxes on at least \$300 worth of property in South Carolina.

The data in the table below summarize voting trends in recent presidential elections. Turnout figures are expressed both in the total number of ballots cast and the estimated percentage of citizens of voting age voting.

The following pages contain returns from 5 Democratic gubernatorial primaries, 6 senatorial primaries, and 3 referenda.

TENNESSEE

Tennessee had no requirements for registration beyond the customary residency, citizenship, and similar provisions. Tennessee had long required payment of a poll tax, but state laws in 1949 and 1951 drastically limited its effect, and the constitutional requirement for payment was eliminated altogether in 1953. Black voter registration grew rapidly during the 1950s and in 1960 reached 59.1 percent of the black voting-age population, which was the highest in the South. In 1970, the approximately 242,000 registered blacks were 71.6 percent of the black voting-age population. Since the number of white registrants also increased, the proportion of black names on the registration rolls changed little. In 1960 black registrants were 12.5 percent of all qualified voters; in 1970 they were 13.1 percent.

The response of Tennessee voters to recent presidential campaigns is suggested below. Turnout figures are expressed in both number of votes cast and in percentage of citizens of voting age who voted.

Included below are 14 primary elections. There are 7 Democratic gubernatorial primaries and 7 senatorial primaries. Tennessee was the only southern state where candidates were nominated by pluralities rather than having to obtain majorities in subsequent runoff elections. Prior to the 1954 elections, Tennessee voters approved a constitutional revision extending gubernatorial terms from two to four years.

STUDY AREA

TEXAS

The principal disfranchisement measure in Texas was the \$1.50 poll tax (or \$1.75 if county officials chose to add an optional 25¢ local assessment), payable no later than January 31 by those citizens 21 to 59 years of age who wished to cast ballots later in the year. In 1963 Texas voters defeated a state constitutional amendment repealing the poll tax (results reprinted below). When the Twenty-Fourth Amendment to the United States Constitution abolished the poll tax for voting in contests for national office, Texas continued to require a payment receipt for voting in state and local elections until the tax was eliminated entirely by a federal court decision in 1966.

The number of people paying the poll tax was considerably higher in presidential election years than at other times. In 1952 the almost 2.5 million estimated qualified voters (those who had paid the poll tax or who were 60 years of age or older) included an estimated 182,000 black citizens. By 1968 registration exceeded four million, more than half a million of whom were blacks. In 1952 eligible black voters were 7.4 percent of the state electorate; in 1970 they made up 13.3 percent. The 550,000 black registrants in 1970 were 72.6 percent of the black voting-age population, while the almost 3.6 million registered whites were 62 percent of white adults.

The Texas vote in presidential elections from 1948 to 1972 is outlined in the following table. Turnout is expressed both in number of votes cast and in percentage of voting-age citizens voting.

Reprinted below are 15 Democratic guber-

natorial primaries, 7 senatorial primaries, 3 special senatorial elections, and 1 referendum, making a total of 26 elections. The 1951 special senatorial election was to fill the seat vacated by the resignation of Price Daniel; there was no runoff election. The 1961 special senatorial election and runoff were to fill the seat formerly held by Lyndon B. Johnson.

A horizontal number line with arrows at both ends. It has three major tick marks labeled 0, 50, and 100. The line is divided into two equal segments by the tick mark at 50.

STUDY AREA

VIRGINIA

A \$1.50 poll tax, payable at least six months prior to election day and cumulative for three previous years, and a literacy test kept the Virginia electorate "purified." When the Twenty-Fourth Amendment declared the poll tax unconstitutional in federal elections, Virginia, like Texas, retained the tax as a requirement for voting for nonfederal elective officials. The 1965 Voting Rights Act banned the literacy test as a prerequisite for registration, however, and the Supreme Court in 1966 ruled the poll tax unconstitutional in state elections.

In 1960 an estimated 867,000 whites and 100,000 blacks were registered, which was approximately 46 percent of the white voting-age population and 23 percent of black adults. By 1970 there were almost 1.5 million white and 270,000 black registrants, or 64.5 percent of whites and 57 percent of blacks of voting-age population registered.

The following table summarizes the behavior of the Virginia electorate in presidential elections from 1948 to 1972. Turnout figures are expressed both in number of ballots counted and in the percentage of citizens of voting age who participated.

Reprinted below are 8 Democratic primary elections, 4 for the governor's office and 4 for the senate. The 1966 senatorial contest between A. Willis Robertson and William B. Spong, Jr., was for a regular six-year term; the simultaneous race between Harry F. Byrd, Jr., and Armistead L. Boothe was for the unexpired term of the seat made vacant by the retirement of Senator Harry Flood Byrd, who was in failing health. When the latter seat came up for the regular six-year term in 1970,

incumbent Harry Byrd, Jr., chose to run as an Independent and did not compete in the Democratic primary.

II Precinct Election Data

The following section contains a substantial sampling of precinct election data from 24 cities in the 11 southern states. All candidates in the state elections are Democrats, unless otherwise identified as Republican (R), Independent (I), etc. For full names of candidates and other information about the Democratic primary contests, the reader may consult the state introductions in the preceding section. For further information about general elections, the most convenient source is Richard M. Scammon's America Votes series.

Preceding the precinct data for each state is a list of the elections reported. As described in the introduction to this volume, the precinct data are presented in socioeconomic and racial categories.
